

Grästorps, Sweden – 17 Apr 2013

PRESS RELEASE

Safety Seal Europe AB, Grästorps, Sweden has acquired the rights to the Safe Wheel wheel-nut retaining rings and Safe Centring wheel-centring rings from *Safe Wheel AB*, Huskvarna, Sweden.

The companies have, after several years of collaboration, agreed on the transfer. Safety Seal Europe AB acquires thereby all the rights to the above products. These become complementary to similar products, e.g. Rollock, which are already marketed by Safety Seal Europe AB in a number of countries both within and outside Europe.

The acquisition will provide Safety Seal Europe AB with a stronger and more comprehensive range of products for wheel-nut security on goods vehicles and busses.

The first major marketing activity will be at Autopromotec in Bologna, during May.

See updates on our website www.safetyseal.eu

For *Safe Wheel AB* the transfer gives the opportunity to further develop its existing range.

Safe Wheel will continue to sell the products Safe Wheel wheel-nut retaining rings and Safe Centring wheel-centring rings.
